

The image features a central text area framed by a thin, light brown border. In each of the four corners, outside the border, there are clusters of vibrant green, oval-shaped leaves, likely from a bay leaf plant, adding a natural and fresh aesthetic to the design.

My Easter Recycling Projects

The image features a decorative border of green leaves in the corners. The leaves are arranged in a way that they appear to be framing the central text. The leaves are a vibrant green color and have a smooth, slightly glossy texture. They are positioned in the top-left, top-right, bottom-left, and bottom-right corners of the image.

Project 1:

Aquarium

This is the Easter egg that my Grandpa gave me for Easter. Once I had eaten the chocolate, we decided to make it into an aquarium!

We found some used
wrapping paper for the
background to give it the
water effect.

We kept the tin foil leftover from a picnic to put at the back of the aquarium to look like rocks.

When we were digging in the garden and clearing the soil to plant some flowers, my mum and I found some stones which we kept.

We had some leftover popcorn from when we watched a film and coloured it in to look like coral.

The fish are made from leftover bits of card from when I made my cousin's birthday card.

My sister and her friends were decorating their leavers' shirts and had a little bit of paint and some stick on jewels left over. We decided to use these to cover the outside of the aquarium as the finishing touch!

The image features a light cream background with a thin, dark brown rectangular border. In each of the four corners, there are clusters of vibrant green, oval-shaped leaves, likely from a succulent, extending slightly beyond the border. The text is centered within the frame.

Project 2:

Terrarium

I used some old jars to create several terraria with bits of garden waste from my Granny's garden.
